

Not All Mats Are Created Equal!

Compare the Facts...

Price verses Value!

**RSP625
1.25" Mat**

- Exclusive AMC2 continuous foam core - ...the best foam available!
- 2-sided - Coated on all sides with Resilite's Polyvinyl formula - bonding directly to foam.
- "Softer" feel - Durometer test of ± 25 .
- Customize in any size or number of sections.
- 20% - 30% lighter weight than other 2-sided vinyl-coated mats.
- **Extensively tested to Absorb impact force** resulting in lower G-Max and HIC scores, meeting all ASTM standards.
- **Available in ResiGuard™** - the first wrestling mat to meet ASTM standards for a Class-A fire rated mat.
- The only mat on the market with optional built-in **Microban® antimicrobial product protection** to help prevent the growth of stain and odor causing bacteria, mold and mildew.
- **Meets or Exceeds ASTM F 1081-03**
Standard Specification for Competition Wrestling Mats in accordance with ASTM F 355 Test Method for Shock Absorbing Properties

SHOCK-ABSORBENCY... The Most Important Consideration when purchasing a wrestling mat!

G-MAX and Head Injury Criterion (HIC) determines the ability of a mat to absorb impacts.

Make The Comparison...

Poly-Laminate, Single Sided 1.25" Mat

- Cross-link polyethylene foam.
- One-sided mat - with no practice side.
- Vinyl attached to top surface only.
- A more "ridged" feel - Durometer test of ± 55 .
- Glued vinyl patch for repairs.
- Can not be reconditioned or resurfaced.
- Exposed foam on sides and bottom make disinfecting and cleaning difficult.
- Seven (7) large sections of rolls to tape and store.
- Does not meet ASTM standards for Class-A fire rated material.
- Does not offer Microban® product protection.
- **Recoils after impact** - impacts rebound back, not cushioning the impact, resulting in a much higher HIC and G-Max reading - providing less shock-absorbency protection.
